General note – all plans need to have an indicative cost

Land Development

Give PDC's confirmation of the Green Belt around the village and the consequent lack of development opportunities, we need to focus on what's available within the current settlement boundary.

Wessex Water – Alf reported that the agent for Wessex Water had agreed to a meeting to discuss how plans could be incorporated into the NP. It was noted that the village did not have a strong case, given that WW could modify its plans to achieve some development. Alf will set up a meeting and notify all.

British Legion – the Legion could be used as a community facility, could be agreed to building houses or try to create employment opportunities. The big issue here is the lack of response/direction from the land agents. Peter has contacted the agent in order to get access and will arrange a time where all have a chance to take as look.

Huntick Road

The NP has a chance to influence the design of the area, such as type and construction of the houses, employment opportunities, preservation of the pond area, link to Jubilee Walk. Alf to make preliminary contact Mr. And Mrs. Hampshire.

School/Traffic plan

A questionnaire had been distributed to all parents prior to the end of term; results of 78 replies below. Mike will follow up to see if we have had more over the holidays.

Lytchett Matravers Neighbourhood Planning - School Parking and Traffic Problems

78 replies to date	Strongly Agree	Agree	Disagree	Strongly Disagree	No View
Eldons Drove - access to school field	34	30	7	4	3
Walking Bus	36	34	2	0	6
Lytchett Astro Car Park	39	23	3	4	9
Bus Stop replacement	53	23	1	0	1
Deans Drove yellow lines	54	16	4	1	3

This is a strong support for the creation of a holistic plan for the school and traffic control to include all the above.

We also discussed improving the path from the Rec. to Eldons Drove to facilitate parking on the Rec. and the walk to school via the Eldons Drove path to the school field.

Village Amenities

Focus on improving what we have and not providing more 'buildings'.

Set out a vision and fact base for each village asset.

- Who owns land and/or building?
- Who manages the premises?
- What is its best use and what needs to be done to improve/promote that?
- What is the cost of improvement?

Set out rationale for Legion as a community centre

Village hall improvements – possible reversal of entrance to car park rather than Vineyard Close

Library – critical to look at expansion of services to promote usage – additional room for coffee shop, small meetings, CAB, etc.

Youth hut for Scouts – set out in N plan with costs

Follow-up on DCC comments on land transfer (may include PDC):

- Can we get the Youth Hut ownership assigned to the Scouts?
- Can we get the library land/building assigned to the PC?
- Can we get the Eldons Drove pathway and field assigned to the PC?
